● Plays as you scroll: the camera pulls back from the knee

One continuous clinic video: the camera reveals the patient, the doctor kneels to examine the knee, then walks to the centre of the room for the next section.

Who is Dr. Elhallaj?

My fascination with the human body made me want to become a physiotherapist,

> along with a wish to help children with cerebral palsy and high-level disabilities.

I have always been interested in how the body works and repairs itself,

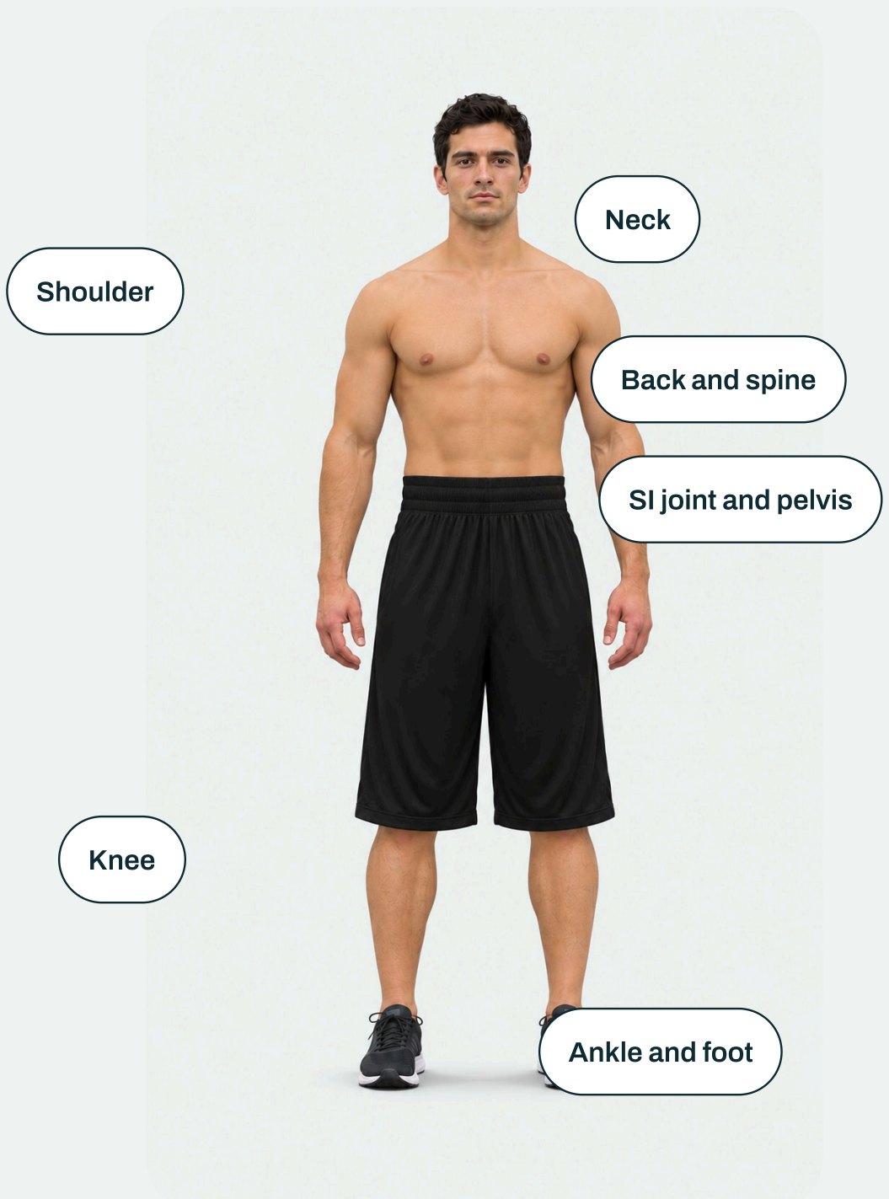
and how exercise and hydrotherapy can improve it.

+18 Years of experience

Consultant Physical Therapist across all PT specialties, with dedicated specialization in post-operative orthopedic rehabilitation, sports injuries, and recovery protocols for optimal function and safe return to normal life and sports.

Where does it hurt?

Choose an area. Kinesio tape goes on, and you see the training behind its treatment.



Selected area

Knee

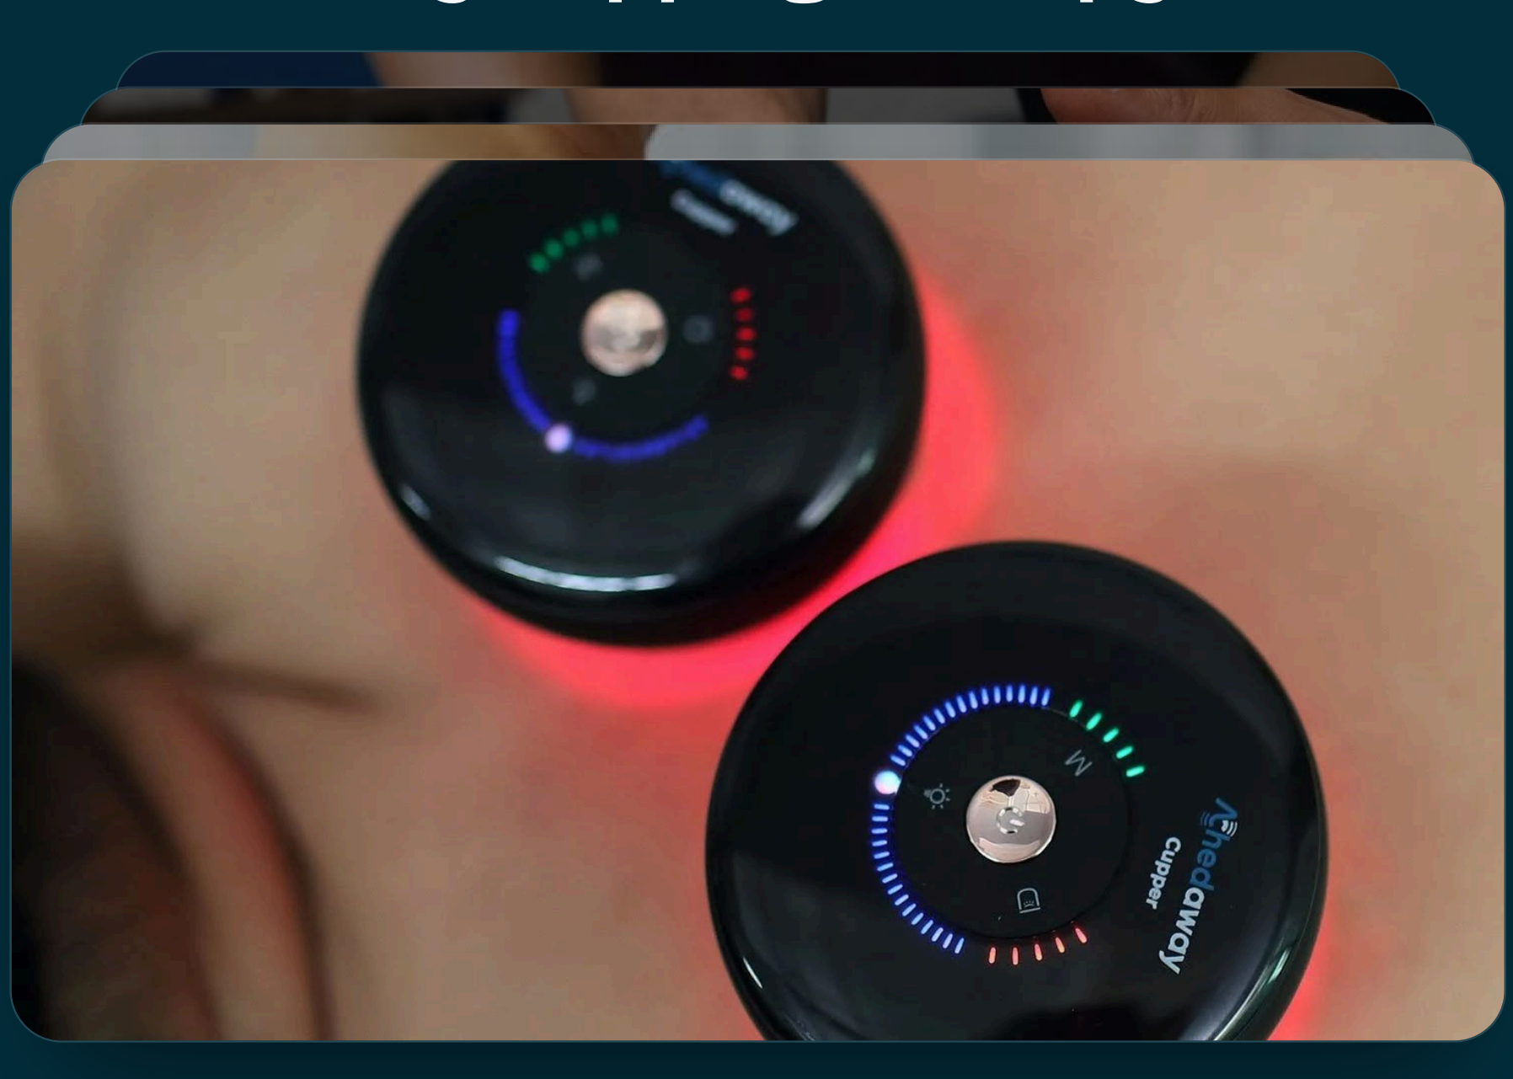
● The cards stack as you scroll, one tool at a time.

01 / 07 RECOVERY

Achedaway Cupping Therapy



We use Achedaway Cupping Therapy to help relieve muscle tension, reduce discomfort, and improve local blood circulation through controlled suction. It is used as part of a recovery program to promote muscle relaxation and support overall mobility.
